

A SIMPLE, STRAIGHTFORWARD PROCUREMENT VEHICLE!

Ease of Acquisition

Because ExecuTech's Navy CTR BPA is awarded against its GSA Schedule 70 contract, the prices for any procurement issued against it are already negotiated and considered "fair and reasonable". This means that the procuring activity always receives the solution it requires at an 'at market' or 'below market' price guaranteed.

Simplifies Contracting

Use of ExecuTech's Navy CTR BPA makes the contracting process for fulfilling the activity requirement more efficient, convenient and flexible. The contracting terms and conditions are already spelled out so the contracting process can move very quickly.

Maximizes End User Flexibility

Even in this era of ubiquitous GWAC vehicles, the ExecuTech Navy CTR BPA is unique in the extraordinary flexibility it provides throughout the entire procurement process.

OUR SMEs ENSURE MISSION SUCCESS!
